Seek Systems and Wiresoft Net Announce New Joint Venture
Seek and Wiresoft form Aurarius, LLC

Woodinville, Washington – December 13, 2004 – Today Seek Systems and Wiresoft Net announced the formation of a new joint venture. The new venture, Aurarius, LLC., will develop software that will be offered to Manufacturers, Systems Integrators and other companies interested in developing and marketing products that address the need for e-mail management and control. Seek will also offer Aurarius' first software module, the Mail Integrity Management module (MIM) with its new Defender appliance, currently scheduled for release at the end of the 4th quarter of 2005.

"This is a watershed moment for Wiresoft, said Ovid Stavrica, President of Wiresoft. We have spent the last 4 years developing Firegate OS, which has helped secure a number of local companies from cyber attack. Now by partnering with Seek Systems to form Aurarius, we can take advantage of Seek's sales, marketing and storage expertise to drive Wiresoft's security message to the enterprise market."

"Seek has long sought a way to expand our storage expertise to other markets," said Wayne Smith, CEO of Seek Systems. "We have been very impressed with Wiresoft's technologies and passion and believe the new Joint Venture will have significant mutual benefits."

Aurarius will be jointly managed by Ovid Stavrica, President of Wiresoft Net and Wayne Smith, Chairman/CEO, Seek Systems.

About Wiresoft Net
